

Diterpenoids from *Azorella compacta*

Loyola, Luis A.

Bórquez, Jorge

Morales, Glauco

San Martín, Aurelio

In addition to mulinolic acid, a new diterpenoid, mulin-11,13-dien-20- oic acid, has been isolated from the aerial parts of *Azorella compacta*. Its structure was based on a spectroscopic comparison with mulinolic acid and on chemical grounds.
