

The isolation and structure determination of chilenone A, a putative dimer of 2-methyl-3(2H)-furanone from the marine alga *Laurenciachilensis*

San Martin, Aurelio

Rovirosa, Juana

Muñoz, Orlando

Chen, Marie H M

Guneratne, Ranil D.

Clardy, Jon

The isolation of chilenone A from *Laurencia chilensis* and the determination of its structure by spectral and x-ray crystallographic techniques is described. © 1983.
