

# On demonyms: Historiography, monikers, and standardization Acerca del gentilicio: historiografía, remoquetes y estandarización

Fajardo, Soledad Chávez

Riquelme, Raïssa Kordic

The present paper explores three topics that are complementary to the study of demonyms we have carried out in two previous essays (Kordic Riquelme and Chávez Fajardo: 2017; and Chávez Fajardo and Kordic Riquelme (in press). First, we introduce a brief historiography of demonyms. Second, we make reference to the moniker, a separate lexical component that is absolutely independent from the ethnic and post-toponymical demonym. Finally, we point out the relevance of demonyms within the standardizing processes, an aspect which in fact has been poorly addressed, but it essential during the first stages of linguistic regulation.
