**Key words:** errata, addenda – protoplanetary discs – accretion, accretion discs.

This is an Erratum to the paper ‘Cooling in the shade of warped transition disks’ that was published in MNRAS, 486, L58-L62 (2019). The x-axis of Fig. 1 in the original version of the paper is incorrectly labeled, the temperature range of the grid for the Rosseland opacities should start at 10 K, not 1 K. Here we provide the correct version in Fig. 1 of this Erratum. This is a typographical error that does not impact on the calculations reported in the original paper.

**Figure 1.**  $\log_{10}(\kappa_R(a_{\max}, T))$  for two dust filling factors,  $f = 1$  and  $f = 0.1$ . The 3 contours correspond to half the extrema of the colour bar and 0.

This paper has been typeset from a Microsoft Word file prepared by the author.
