Contents

Objectives **1**

Methodology **2**
1 Resources Used . . . 2
2 Work Methodology . . . 3
2.1 Task Study and Planning . . . 3
2.2 Data Preprocessing . . . 3
2.3 Feasibility Analysis . . . 6
2.4 Model Training . . . 7
2.5 Evaluation & Interpretation . . . 10

Abstract **12**

Section I: Introduction **13**
1 Motivation . . . 13
2 Context . . . 14
2.1 Condition Based Maintenance . . . 14
2.2 Oil Analysis and CBM . . . 14
2.3 Oil Analysis Process and Big Data . . . 15
2.4 Advantages of Oil Analysis over Vibration Monitoring . . . 16
3 Machine/Deep Learning Approach . . . 17
3.1 Challenges of Oil Analysis Automation with Machine Learning . . . 17
4 Proposed Work . . . 20
5 Scope . . . 21
6 Future Potential . . . 22
7 Section Overview . . . 22

Section II: Related Work **23**
1 Classical Analysis & Rule Based Systems . . . 23
2 Machine Learning Approaches . . . 24
3 Deep Learning Approaches . . . 25
4 Overall . . . 25

Section III: Theoretical Background **27**
1 Machine Learning . . . 27
1.1 What is Machine Learning? . . . 27
1.2 Tasks . . . 27

1.3 Feature Scaling . . . 30
1.4 Model Evaluation . . . 31
2 Machine Learning Model Ensembles . . . 33
2.1 General Concepts . . . 33
3 Case Study Machine Learning Models . . . 36
3.1 Traditional Models . . . 36
3.2 State of the Art Models . . . 37
4 Deep Learning . . . 41
4.1 What is Deep Learning? . . . 41
4.2 Case Study Deep Learning Models . . . 47
4.3 Convolutional Neural Networks [LeCun et al., 1999] . . . 47
5 Bayesian Modelling [Bayes, 1763] . . . 48
5.1 Bayes Theorem . . . 48
5.2 Bayesian Statistics . . . 48
5.3 Bayesian Inference . . . 49
5.4 Uncertainty is Key . . . 52
6 Bayesian Theory in Deep Learning . . . 52
6.1 Need for Uncertainties in Deep Learning . . . 52
6.2 Bayesian Neural Networks with Variational Inference . . . 53
6.3 Bayesian Neural Network Back-propagation . . . 54
6.4 Flipout[Wen et al., 2018] . . . 56

Section IV: Case Study - Automatic Machine Health Diagnostics via Oil Analysis 58
1 Task Overview . . . 58
2 Task Overview . . . 60
2.1 Dataset . . . 61
2.2 Features . . . 62
2.3 Machine Condition Label Characterization . . . 65
3 Training . . . 68
3.1 Procedure, Challenges & Solutions . . . 68
4 Models & Parameters . . . 73
4.1 Tree-Based Models . . . 73
4.2 Deep Neural Networks . . . 75
4.3 Bayesian Neural Networks . . . 76
4.4 Hyper-parameter Tuning: Bayesian Expectancy Improvement . . . 79

Section V: Case Study Results 82
1 Model Architecture & Test Results . . . 82
1.1 Evaluation Metrics . . . 82
1.2 Threshold Selection . . . 82
1.3 Decision Tree Full Results . . . 83
1.4 Random Forest Full Results . . . 84
1.5 Extra-Randomized Trees Full Results . . . 85
1.6 Light Gradient Boosted Machine Full Results . . . 86
1.7 Extreme Gradient Boosting Full Results . . . 87
1.8 Convolutional1D Neural Network Full Results . . . 89

1.9 Multi Layer Perceptron Neural Network Full Results 90
1.10 Flipout Convolutional1D Neural Network Network Full Results . . . 92
1.11 Flipout MLP Neural Network Network Full Results 95
2 Overall Model Performance Comparison 98
2.1 F1 Score Model Comparison 98
2.2 Time & Number of Parameters Comparison 98
2.3 Simulated OOD Response 99
2.4 Graphical Results Examples from Flipout Neural Networks 99

Section VI: Discussion **103**
1 Bayesian Hyper-Parameter Optimization 103
2 Model Comparison 104
2.1 Time 104
2.2 Model Analysis - F1 Score 106
2.3 Out of Distribution Simulation 111

Section VII: Conclusion **113**

Bibliography **116**

Appendix **120**
1 Appendix 1: Bayesian Hyper-parameter Optimization Process & Training Plots 120
1.1 Decision Tree 120
1.2 Random Forest 120
1.3 Extra Randomized Trees 121
1.4 Extra Gradient Boosting - XGBoost 121
1.5 Light Gradient Boosting - LGBM 121
1.6 Neural Network - Multi Layer Perceptron 122
1.7 Convolutional 1D Neural Network 123
1.8 Flipout Multi Layer Perceptron Neural Network 124
1.9 Flipout CNN1D Neural Network 125
2 Appendix 2: Full Graphical Plots of Example Samples - Flipout CNN1D . . 126
2.1 Confident Prediction Example 126
2.2 Wrong Under-confident Prediction Example - Median Rejected 127
2.3 Multiple Fault or Transition Fault State Identification 128
2.4 Accepted Simulated OOD 129
2.5 Rejected Simulated OOD - STD Rejected (Over-confident) 130
2.6 Rejected Simulated OOD - Median Rejected (Over-confident) 131
