

Editor's Introduction: Celebrating Roberto Torretti

Cristián Soto

In *Current Debates in Philosophy of Science: In Honor of Roberto Torretti*. Springer Verlag. pp. 1-13 (2023) Copy BIBTeX

Abstract

This volume collects previously unpublished contributions to the philosophy of science. What brings them together is a twofold goal: first and foremost, celebrating the name of Roberto Torretti, whose works in this and other areas have had – and continue to have – a significant impact on the international philosophy of science community; and second, the desire of advancing novel perspectives on various issues in the philosophy of science broadly construed. In what follows, I firstly offer a brief biographical note on Roberto Torretti; second, I suggest considering Torretti's philosophical production as belonging to the tradition of natural philosophy; and third, I provide an outline of what is to come in the rest of the book.
